

“SHOWSTOPPERS”

Technical Requirements

- Size of Stage:** 20 feet x 20 feet
- Sound System:** good quality system with Phantom power, CD player and speakers
1. Monitors (2);
 2. 4 microphone stands and cables;
 3. 4 powerful omni-directional mics;
(We own and can provide four audio-technica AT935QMRx mics.); and
 4. Two or more wireless remote microphones.

To ensure proper sound quality, please place speakers in front of mics. While this is obvious to most, many of our performances have been prejudiced by the failure to follow this simple rule.
